

# PI Data Cleanup Services

Do more with your Predictive Index™ data by letting us help you make it:

- Clean
- Current
- Connectable

## Clean Data

Over time, PI data can become cluttered with expired assessments and duplicate data, frustrating your efforts to find what you need.

We will remove expired and duplicated assessments, leaving behind only people who have useful assessment data.

## Current Data

- Have you hired people that still appear in PI as candidates with personal email addresses?
- Do you need to preserve employee assessment data before anonymizing old candidate data?
- Have you made changes in your organization and need your PI folder structure and data to match?
- Do you need to correctly link people in PI data with those in your HRIS/HCM system?
- Use PI org structure upload without duplicates?

We work with you to fix your PI data to match your current employee info, remove unwanted person data, and organize using your HRIS/HCM data.

## Connectable Data

Do you need to correlate and analyze your PI assessment data with other organization data?

Once your data is clean and current, we can export all your Behavioral and Cognitive Assessment data from PI so you can combine it with other data for reporting and analysis.

## What to Expect

1. We meet to establish your data goals
2. You securely share a PI API Key and your employee data with Believable Magic
3. Believable Magic performs cleanup and a “test” run to correct your employee data in PI
4. You review the results of the “test” run and provide feedback. Clarifications happen here.
5. Believable Magic performs the “live” updates.
6. Data exports provided before & after updates.

## Pricing

Employee Headcount	Service Cost (USD)*
1-50	\$ 750
51-100	\$1,500
101-500	\$2,500
